

# GEOGRAPHY

## Major in Geography

Geography is the study of places on Earth and their relationships with each other. It can also be defined as an integrated study of people, places, and environments, including both physical and human approaches. Geographers employ a spatial perspective to analyze the interactions between humans and their environment. They identify locations, characterize world regions, analyze space and place, and relate nature and society. The Bachelor of Arts in Geography provides students with basic geographic literacy, empowers students to explain geographic patterns and processes, and allows them to be able to apply geography to solve problems.

Additional opportunities include earning our Geographic Information Science (GISc) certificate. GISc. involves the application of spatial information and mapping technologies to solving complex problems which exist over space. Since most human pursuits and environmental events of interest occur on the surface of Earth, GISc applies to many fields of academic inquiry, from geography and ecology to marketing, sociology, public health, and political science. Employment prospects for geographers are very high, especially in the field of GISc.

## Make an Impact

The breadth and depth of knowledge gained will prepare graduates for a variety of career paths...

- Geographic Information Systems (GIS) Analyst
- Remote Sensing Technician
- Cartographer
- City/Regional Planner
- Logistics Specialist
- Transportation Manager
- Emergency Manager
- Location Scout
- Marketing Specialist
- Spatial Epidemiologist
- Climatologist
- Geomorphologist
- Hydrologist
- Conservationist
- Environmental Regulator
- Sustainability Coordinator
- Agricultural Planner
- Real Estate Analyst
- Insurance Claims Adjuster
- Travel/Tourism Guide
- Park Ranger
- Outdoor Recreation Manager
- Foreign Service Officer
- Educator/Researcher
- Community Development
- Cultural Resource Assistant
- Historic Preservationist

...the possibilities are endless.

## Develop Skills

**analysis** GIS applications  
**communication** **synthesis**  
**research** **teamwork**  
**map interpretation**  
**leadership** geographic factors  
**GIS applications** data analysis  
geographic processes  
**research** critical literacy  
**comprehension** awareness  
**geographic patterns**  
**global perspectives**  
persistence **interpretation**  
**communication**  
**independence** data analysis  
GIS applications **detail-oriented**  
consideration **time management**

## Explore and Engage with Geography

Pursue an internship

Join a related student organization

Meet with Geography faculty members and Geography majors

Meet with a career advisor to discuss your plan

Add a minor or pursue a double major in another field requiring a B.A. degree

Add a Certificate program: GIS, Global Foodways Studies, or Sustainability

Talk to your academic advisor

Connect with alumni via LinkedIn

## Top employers/fields at GC\* for Geography majors

Icon Engineering

Geospatial Technology

GEICO

Education

Thomas and Hutton

Real Estate

\*based on GC First Destination Surveys, 2019 - 2022 and Geography department data

## Considering adding a Minor?

These minors can complement the Geography major

- Environmental Science
- History
- Anthropology
- Spanish
- Urban Studies
- Public Health
- Management Science
- Biology
- Geology
- Political Science
- Sociology
- French
- International Studies
- Global Health
- Marketing
- Management Information Systems

## Mean Starting Salary for Geography majors

\*based on NACE First Destinations for the College Class of 2020 for Sustainability Sciences majors
