Painting

**Job:**

Recruiter at

Mailchimp

## WHAT DO YOU DO ON A DAY-TO-DAY BASIS?

I'm a recruiter at Mailchimp (recently acquired by Intuit). I recruit software engineering and data engineering talent, so my days are spent looking at applications, talking with candidates, making offers, and partnering with hiring managers at my company to find the perfect fit for their job opening. It's kind of like matchmaking but for jobs.

## DO YOU HAVE ADVICE FOR STUDENTS?

"Be the person who says YES to taking on more responsibility! It really stands out to your leaders when you're the person who volunteers to take on additional projects and try new things at work. I think saying yes at work has been instrumental in helping me find what type of work I like to do and progress in my career."
