

Susan Kerr has over 30 years of experience in higher education, with more than 20 years in the University System of Georgia and 18 years in IT management. She started her career as a collegiate mathematics instructor at Georgia Southern University, where she developed a passion for teaching with technology. Susan moved from a faculty position into an instructional technology role while at Georgia Southern, but then moved to Atlanta to serve as an Instructional Technologist for Georgia Perimeter College. While at GPC, she began to move up through various IT management roles, settling in as the Director of Educational Technologies. She then moved to Georgia Gwinnett College, where she started as an Instructional Designer and moved into the Director of Support Services role.

After a combined 20 years in the University System, Susan switched gears and took a position with Ellucian as a Client Partner, serving Florida and Georgia higher education clients. Having a desire to work more directly on college campuses, she took a position with Dynamic Campus Solutions, an IT consulting firm that worked solely with higher education clients. With DCS, she had several roles that provided a vast array of services to various colleges and universities in the US and Puerto Rico.

Susan now serves as the Chief Information Officer for Georgia College & State University, where she provides leadership, integrative management, and direction for the University's Information Technology department. Her responsibilities include institution-wide strategic planning, budgeting for information technologies, and coordination and integration of all University IT matters. She also recommends IT policy at the highest level and serves as the University's senior leader on issues related to all systems, including but not limited to administrative, student and faculty support, learning management, academic information systems, and IT systems that support the institution.

Susan has a Master of Arts in Mathematics from the University of Georgia and a Bachelor of Science in Mathematics with an emphasis in Computer Science from Georgia Southern University. She also has an Associates Degree in Practical Theology from Christ For the Nations Institute in Dallas, TX. Throughout her career, Susan's specialization has been in team-focused leadership built on strong pillars of exceptional customer service, technical management, hard work, and excellence.
