... take attendance in my class?

According to the **undergraduate catalog** and the **graduate catalog** class attendance policies, you should have an attendance policy stated on the course syllabus that is distributed to all students.

You are required to report which students are attending or not attending your course during the first week of classes (or equivalent time for summer terms). This is a federal requirement, and is a critical process to ensure that all students are properly enrolled and that you receive credit for the students you are teaching.

According to both catalogs, the “instructor has the right to assign a grade of F for excessive absences when a student exceeds the number of allowable absences specified” on the syllabus attendance policy. To do so, the faculty member must file an “F for Excessive Absences” form with the Registrar. Students may not drop the course if this grade has been assigned. In addition, you must report the last date of attendance or participation for any student to whom you assign a grade of F or U.

Per the **Student Absence Policy, General and Religious**, “Faculty members and college officials who are sponsoring official activities of the college (i.e., student government, athletics, debate, chorus, band, field trips, etc.) should send a list of the students involved in their activity to the Office of the Provost on the Student Request for Excused Absence form in time for her to approve, and in time for the college sponsor to notify affected faculty by memo before the scheduled absences occur. If that is not done, then the student can be penalized by the instructor for those absences.”

Per the Class Attendance Policy, “If a student is representing the University in an official capacity, as verified on a list released from the Office of the Provost, the instructor will not penalize the student for those absences. However, students should consult their instructor before anticipated absences.”
