

Welcome to GC&SU

Natural History Museum

We are so excited that you chose to visit our museum. Do you remember what you learned at the museum today? Here are a few questions about what you or your group encountered today.

List three words or concepts that all museums have in common.

Describe one process that forms a fossil?

What is an exoskeleton?

What is a coprolite?

Crustaceans and insects are examples of what group of animals?

What does the word "amphibian" mean?

What is one of the oldest reptiles living today?

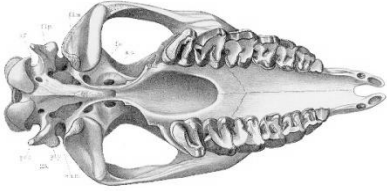

What is an ice age?

What bone of a T. Rex is on display at the museum?

Fill in the information for the specimens below
as if you were making a museum label of your own.

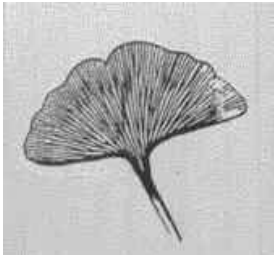

Name: _____
Age: _____ million years old or _____ thousand years old or recent
Location: _____
Information: _____
